Demonstration

Self Critique: What did we do well?

- Our website looks nice
- Has basic website functionality
- Functional backend

Self Critique: What did we learn?

- How to build a website
- AWS
- Backend stuff(flask, sqlalchemy, mySQL, DB, api, etc)
- React

Self Critique: What puzzles us?

- Mysterious api bugs
- Visualizations
- Mocha testing
- Learning basic things

Self Critique: What can we do better?

- Implement search/sort on the backend and properly connect with frontend
- Prettier and more diverse visualizations with axis and labels
- More communication between front end and back end
- Start earlier and meet more often

Other Critique: What did they do well?

- Looks amazing
- sorts /search/filter works well
- Everything runs smoothly

Other Critique: What did we learn from their website?

- Efficiency/speed
- UI improvements

Other Critique: What can they do better?

- More filter options
- Add GPA attribute for universities
